

## 梅特勒-托利多单点式传感器 MT1241

---

### MT1241 - 铝制单点式传感器

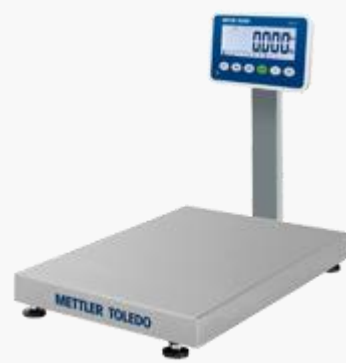

MT1241 是中容量单点式称重传感器，适用于台秤。弯曲梁式设计可使安装简便。传感器量程为：50, 100, 150, 200, 250 kg。

规格- mt1241 - 铝制单点式传感器  
最大秤量 30kg - 250kg (66lb - 550 磅)  
材质铝  
应用工作台和地面规模最大平台 400x400mm  
电缆长度 2m  
防护等级 IP67 的盆栽  
认证 OIML C3, NTEP III M 5000  
防爆认证 ATEX 标准在每个负载细胞  
物料号 (S) 71207453

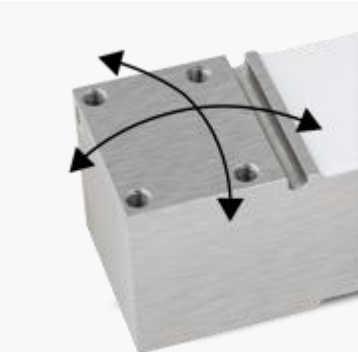

### MT1241 - Easy System Integration

MT1241 is a mid size capacity single point load cells and can be used individually in bench and floor scales with platform size 400x400mm. The moment insensitive design allows for simple installations. Available in the capacities: 30 - 250kg.

### Bench and Floor Scales

MT1241 provides the best weighing performance for bench scales and smaller floor scales in its capacity range. With a low profile design, cost optimization and an attractive product appearance can be achieved.

### Off-Center Compensation

One load cell can be used to support a weighing platform and due to the off-center load compensation the MT1241 will weigh within tolerance regardless of load application point.

### Robustness

MT1241 allows 50% static overload without compromising the weighing performance. The passivated aluminum provides good corrosion resistance suitable for many industrial applications.
