

FC21 & FC22 Compression Load Cells

LOW COST

Compression Ranges: 2, 5, 10, 25, 50 and 100 Lbf.

High Level or Millivolt Outputs

Interchangeable

Compact Easy to Fixture Design

DESCRIPTION

The FC21 and FC22 Series Low Cost
Compression Force Sensors create new markets previously unrealizable due to cost and performance constraints. This series raises the bar in price and performance. MSI Sensors' proprietary Microfused™ technology, derived from demanding aerospace applications, employs micro-

FEATURES

- ◆ Low cost
- ◆ Small size
- ◆ Low noise
- ◆ Robust: high overrange capability
- ◆ High reliability
- ◆ Low deflection
- ◆ Essentially unlimited cycle Life expectancy
- ◆ Low off center errors
- ◆ Fast response time
- ◆ From 2 to 100 lbf ranges
- ◆ Reverse polarity protected

APPLICATIONS

- ◆ Medical infusion pumps
- ◆ Robotics end-effectors
- ◆ Variable force control
- ◆ Load and compression sensing
- ◆ Exercise machines
- ◆ Pumps
- ◆ Contact sensing
- ◆ Weighing
- ◆ Household appliances

machined
silicon
piezoresistive
strain gages
fused with high
temperature glass
to a high performance
stainless steel substrate.

Microfused™ technology eliminates age-sensitive organic epoxies used in classical load cell designs providing excellent long term span and zero stability.

Operating at very low strains, Microfused™ technology provides gage factors greater than 100, an essentially unlimited cycle life expectancy, superior resolution, exceedingly high over-range margins without the need for stops and a ratiometric span of up to 4V.

Microfused™ sensors are used in a variety of applications including bathroom scales, paint sprayers and safety-critical automotive brake sensors.

MSI's models FC21 and FC22 are appropriate for use in all types of OEM weighing and force measurement applications where high reliability and accuracy are critical. From appliance controls to biomechanical force feedback, the FC21 and FC22 are the OEM designer's dream-come-true: cost-optimized to bring your OEM products to life whether you need thousands or millions of load cells annually. Although the standard model is ideal for a wide range of applications, our dedicated design team at our Load Cell Engineering Center is ready to provide you with custom designs for your OEM applications. The FC21 and FC22 are fully thermally compensated for changes in zero and span with respect to temperature and offer normalized zero and span for interchangeability. Consult MSI for uncompensated super low cost variants of the FC21 and FC22 instruments.

CE compliant per the following specifications:

IEC61000-4-2	[4 KV/4 KV (Air/Contact)]
IEC61000-4-3	(3 V/m)
IEC55022	Class A

FC21 & FC22 Compression Load Cells

performance specifications

Standard Ranges: FC21

FC22	2, 5, 10, 25, 50, 100 Lbf Compression
Maximum over load	250% of range
Recommended Excitation Voltage (Amplified)	3.3 VDC to 5 VDC (1)
Recommended Excitation Voltage (Bridge Only)	5 VDC
Output Span (Amplified/Ratiometric)	0.5 to 4.5 V +/- 3% of Span at 5 VDC excitation
Full Scale Output Span (Bridge Only)	FC21: 6 mV/V +/- 5%, FC22: 20 mV/V +/- 5%
Output at No Load (Zero output)	+/- 5% FSO (2)
Combined Non-linearity, Hysteresis and Nonrepeatability	<+/- 1% FSO
Long Term Stability (1 year)	+/- 1% Span (Typical)
Temperature Compensation	0 - 50° C
Thermal Zero Shift	<+/- 0.05%FSO/°C
Thermal Sensitivity Shift	<+/- 0.05%/°C
Operating and Storage Temperature Range	- 40° C to 85° C
Humidity	0 - 90% RH
Input Resistance (Bridge Only)	3K ohms (nominal)
Output Resistance (Bridge Only)	2.2K ohms (nominal)
Deflection at Rated Load	< 0.05 mm
Isolation Resistance	> 50 Mohms@ 250VDC

1) Higher excitation voltages available on request.

2) Lower trim values available on request (FSO: Full Scale Output)
