CAUTION

Do not exceed maximum ratings and ensure sensor(s) are operated in accordance with their requirements.

Carefully follow all wiring instructions. Incorrect wiring can cause permanent damage to the device.

SST Sensing Ltd recommend using alcohol based cleaning agents. Do NOT use chlorinated solvents such as trichlorethane as these are likely to attack the sensor material.

Failure to comply with these instructions may result in product damage.

- Hex nut and O-ring sold separately; email: support4@apolounion.com for details.
- NPT version can be sealed with a curing type thread sealant such as "Loctite 565" with primer "N". Do NOT use PTFE tape.
- When correctly sealed.
- Do NOT over-tighten as this can permanently damage the sensor.

CAUTION: Take care when connecting loads.

The minimum load impedance should not exceed Vs/max output current.

Note: Shorting the output to Vs or 0V will result in irreparable damage to the sensor.
